IMPORTANT TO PARENTS AND GUARDIANS. MOUNT DE CHANTAL ACADEMY OF THE VISITATION,
NEAR WHEELING, W. VA.

Parents in quest of a first-class school for their daughters will do well to investigate the claims of this elebrated Academy. For thoroughness in every department of female education MOUNT DE CHANTAL ranks pre-eminently high. Great attention is given to perfect the pupils in writing and speaking French with fluency. For those sufficiently advanced it is the language of their recreation hours. The pority of accent and correctness of pronunclation acquired in this institution have long been a subject of surprise to the native Parisian. The removal for the superiority in music is so widespread as to have made this Academy almost a national one. One feature in particular that should recommend MOUNT DE CHANTAL to the sensible parent is the influence exercised to form the pupils to views and labits of economy, and to render them really practical and useful women of society in after years. Simplicity of dress is enforced by rule. practical and useful women of society in after years. Simpleity of dress is enforced by rule.

These facts, united to the exceedingly moderate rates of board and fultion (\$200 per annum), will, we trust, secure to this school as large and desirable a patronage in the future as it has enjoyed in the

The Hell-Gate Explosion. GENERAL NEWTON'S REASONS FOR EXPECTING

OF EXPERIMENTS MADE-HOW THE EXPLO-SIVES ARE DIVIDED UP-A POSTPONEMENT FOR A FEW DAYS. [From the New York Tribune.] A Tribune reporter called upon General

lewton at his residence, in Brooklyn, last evening, to make inquiries as to the truth of the reports that great damage would be done to property when the Hallett's-Point explosion takes place. General Newton

the water, and that when the cartridge was St. Louis Times. sixteen feet under water.' I wish to declare this statement absurd and false, no matter whom it comes from. That amount of glycerine has not the power to perform any such work. We have fired upon Coenties Reef 1,100 pounds of glycerine simultaneously, in charges of from fifty to eighty pounds, and on that occasion one rock weighing about a ton was thrown twenty feet in the air. That I saw myself. It has been proved by experiments at Hallett's Point that it takes from one and a half to two pounds of nitro-glycerine to break up one cubic yard of rock, and we have not at that place, and will not have, more than three fourths of a pound of dynamite and other explosives used-all of which are of a lower grade than nitro-glycerine-to every cubic yard to be broken up. These explo-sives, when fired, are not to be exposed openly in heaps on the floors of the galleries, but are to be packed away in nearly 4,000 small holes drilled in the rock and separated from each other. It must be borne in mind that the dam is to be pierced, and that the whole work will be flooded form their full work upon the rock, which power.—Index-Appeal. will leave no opportunity for the explosives escape and perform any eccentricities. The quantity of work to be done by the CHOCKOE HILL ACADEMY, No. 412 charge in each hole in breaking up the rock

heat are convertible terms. The heat, there-

fore, due to each blast-hole will be expended

in overcoming the resistance of the rock,

and hence the gas which does escape, being

deprived of heat, loses its tension, and consequently its destructive properties, and when it finally emerges in the atmosphere it will have little or no dispersive action. But in addition, this gas has not only to pass through the rock through a multitude of cracks and ruptures which it causes, but in this divided state it has likewise to pass through the water, parting thereby with any heat that may be left in it. In addition to this the gases formed by the explosion of nitro-glycerine contain in themselves a great quantity of watery vapor, which will be condensed by the cold rock and by the water. It follows from these facts, which cannot be controverted, that the effect on the atmosphere will be nothing; or, on the other hand, the only external effect produced will be caused by a few isolated charges here and there partially escaping through a seam and making harmless jets of water. It is further made plain by these facts that this case will be entirely different from the explosion of a powder-mill. or of nitro-glycerine in the open air. In these instances the whole energy of the explosive is exerted upon the atmosphere, the waves of which, propelled with disastrous velocity, would destroy a neighborhood. Hence it is very plain that the buildings in concussion, such as certain critics seem to be alone familiar with. A barrel of gunpowder in mass, exploded either in the air, or embedded in the earth, would produce a much greater effect than if it were distributed over a larger area in say five-pound charges. In other words, a large quantity of explosives, distributed over a large area, and in small charges, would produce effects trifling in comparison with the same amount charges, and only to a few of those charges: in other words, the concussion in the rock which will be propagated along the line of reef will be due only to the charges which lie on the line of separation between the rock to be demolished and the part of the reef which remains. Finally, as a matter of course, the Government cannot be stopped from prosecuting its public works by the possible effects-even if critics are correct-which an explosion may have upon property alone in the neighbor-Government officers are bound hood. to protect human life, and to do as little damage to property as possible—that is all.

wish to say that after giving to critics the benefit of all their assertions, I am quite decided in my opinion that the amout of damage will be very triffing." In regard to the time for the explosion, General Newton said he had not fixed the day. He would have been ready for the 20th had the contractors been prompt in delivering the explosives, but they were so far behind that it would be difficult to say when everything would be in readiness. It was scarcely possible that the explosion

would take place this week.

Further than this citizens must look to the

Government itself for damages, as the break-

ing of panes of glass, the falling of plaster-

ing, or even the cracking of walls in resi-

dences near by, should not and cannot stop

works of national importance. But I also

NEW YORK, September 21 .- At nine minutes to 3 o'clock on Sunday afternoon, Sep-

Political Points.

Hon. S. S. Cox addressed a large Tilden and Hendricks meeting at Wheeling, West About 3 o'clock last Saturday afternoon Va., on Tuesday evening.

The chairman of the Indiana Republican Executive Committee rejected the proposition for a joint discussion at Indianapolis between Hons. B. H. Bristow and Henry Watterson, of Kentucky.

Says the New York Sun: "Brother Blaine seems to be in first-class physical condition. It is not often that a man so suddenly and so completely recovers from a sunstroke. But Congress had adjourned, and Mulligan has gone home."

The election in Colorado on the 10th of October will have uncommon interest, from the fact that the Legislature then chosen will elect two United States Senators and also the presidential electors of the State. McKee, who is in the penitentiary for

robbing the Government, offers through his St. Louis Globe-Democrat to bet \$2,000 on the Republican party in the coming elec-Can Hayes be relied upon as a promoter of economy? Uncle Sardis left him about half a million dollars, and the next year

Haves reported to the county authorities

that he had only \$100 cash on hand. A man

who will run through \$499,900 in one year NO SERIOUS DAMAGE TO PROPERTY-RESULT is a reckless spendthrift.-Courier-Journal. Of two evils it is always wise to avoid the one which imposes the larger responsibility. The Republicans cannot sustain Butler and thus promote Butlerism without being held to an accountability for his ufterances and actions in the Forty-fifth Congress. - Boston Journal (Republican).

The Radicals employ for political purposes during this campaighn eighty thou-sand office-holders, a standing army of "I have seen published a statement this evening, purporting to come from a Mr. in the United States, and the Associated Campbell, to the effect that he 'saw a 13- Press. The people have heavy odds to fight pound charge of glycerine lift a rock weigh-ing a ton and a half over thirty feet out of the robbed largely outnumber the robbers.

The assessments on the office-holders thus far have brought out nearly five millions, a proportionate part of which has been sent to Indiana. Thus it will be observed the tax-payers, having put a body of irresponsible politicians in office, are forced to pay their money to enable these thieving scoundrels to continue in the places they have dishonored .- Chicago Times. Governor Tilden's managers have not ex-

pended a dollar in Maine, and we do not believe the Governor himself has given two hours' attention to the newspaper record of the canvass in that State during all the weeks it has been in progress. He knew, as everybody else knew, that Maine was hopelessly Republican, and that it would be absurd to make any frantic efforts to carry it .- Utica (N. Y.) Observer. Fred. Bauer, the great German brewer, is the World, would hurt Baltimore, but he insulted by the New York Tribune be- did not say those reports were true .- Sun.

cause he advises the people of his nationality and faith to oppose Hayes and Wheeler. The Radical papers clamor for free speech and free suffrage; but as soon as anybody with water to the level of the tides. The takes the other side in politics or religion charges, being tamped with water confined they are quick to denounce him, and would in the galleries, will be compelled to per- be equally swift to crush if they had the

The Hayesite journals commenced a few days ago to tickle their fancy with featherdusters, alleged purchases of Blue Jeans cerning an alleged transaction on the railwhile chairman of the Committee on Accounts. They found cork-screws, toothbrushes, cosmetics, and various articles suggesting luxury, and cried, with great unanimity and in a tone of derision, scratch the fustian on the outside of this fellow and you'll find a silk undershirt. They denounced such purchases as robbories, and, generally, were in high glee at their discovery. Just now, however, they are in mourning. The purchases were all made by the Republican clerk of the House, who turned them over to Jeans as the official custodian of such property. Jeans put a stop to such nonsense. There may be a silk shirt under his homespun, but it's a clean one. Chicago Times.

A correspondent of the Salem Register writing from Franklin county says: I had the pleasure of meeting my old friend and school mate, Colonel David S. Graves, who is an independent candidate for Congress in this district. My interview with him was short, from the fact he was a member of the grand jury which was in session during most of my stay. I learned, however, that he is a candidate, and intends to run the race through. He is neither for Tilden and Hendricks nor Hayes and Wheeler, but says he could cheerfully support a ticket with Hendricks for President and Hayes for the second positition; which to my mind seemed to be a rather strange mixture of incongruous elements. He says he is going to canvass the mountain counties of the dis-

trict thoroughly. A crowd, which the lowest estimate places at four thousand, assembled in Charlotte Astoria will not be shaken by atmospheric | Thursday to hear the discussion between Governor Vance and Judge Settle. Twenty mounted marshals escorted Governor Vance from his home, in a four-horse phaeton to the Central Hotel, where Judge Settle was invited to join him. The two rode together to the ground. Judge Settle opened the debate. No especial new points were brought out in the discussion. The very best of order prevailed, for which Judge Settle expressed himself as profoundly concentrated in one spot or divided into large thankful. Towards the conclusion of the charges. This is precisely the principle that debate Judge Settle became angry, and an has been pursued at Hallett's Point. The animated colloquy occurred between Govexplosives are divided into comparatively ernor Vance and himself. No interruption small charges over an area of three acres of occurred, however, and the day passed off rock, each charge having its full amount of with marked quietade considering the work to do in the rock. The concussion crowd. Judge Settle did not 'do himself upon the rock will be that due to small credit to-day, while Governor Vance was immense.—Raleigh (N. C.) News.

> AID FOR WASHINGTON AND LEE UNIVER-SITY .- The Philadelphia Times states that a movement has been organized in connection with the Centennial celebration for the purpose of increasing the endowment of Washington and Lee University, at Lexington, Va. (which was founded by George Washington and presided over for several years by General Robert E. Lee), by contributions from all parts of the country as centennial offerings or expressions of good-will towards the school, as well as to serve the important purpose of strengthening the cause of education where strength is sadly needed. In furtherance of this object a meeting will be held in Philadelphia on the 10th of October, northern and southern men, Republicans and Democrats, having cordially united in the call. Among the prominent gentlemen interested in the movement are ex-Governor Curtin, Franklin B. Gowen, Chief-Justice Waite, Senator Randolph, of New Jersey; Hon. Charles Francis Adams, Senator Bayard, Congressmen Hoar, Pierce, and Banks, of Massachusetts; Judge Black, William M. Evarts, Senator Thurman, and others of equal prominence.

THE WOODEN BUILDINGS NEAR THE CEN-TENNIAL GROUNDS DOOMED .- Tuesday afternoon the Philadelphia grand jury, accompanied by a number of officials, visited the vicinity known as "Shanty Town," near the Centennial Grounds, with a view to ascerutes to 3 o'clock on Sunday afternoon, September 24th, 50,000 pounds, of explosives, what a view to ascertainthe my STOCK before purchasing. We packed in the mine beneath the rocks of Hell Gate will be fired. The tide will at that moment be at its highest, and it is thought the river will be less crowded by vessels on their way out into the Sound than at any other house.
